

Straight Line Cutting Machine

The high performance ***TRACKER CG30 DOUBLE*** straight line cutting machine for oxy/fuel cutting.

The TRACKER CG30-DOUBLE is a step less variable speed carriage with oxy/fuel gas cutting torch mounted on a straight line track. Built to industrial standards the CG30-DOUBLE provides high quality oxy/fuel cuts on steel plates and structures where straight line accuracy is paramount. With addition of the CG30 Circle Cutting Attachment the CG30-DOUBLE will cut circles with a high degree of accuracy. The TRACKER CG30-DOUBLE is the low cost, high quality, value alternative. It is known around the world as one of the best portable cutting machines in the industry.

Technical Data
